The fire company was called out twice, Thursday evening of last week, during the heavy wind and rain storm. Both alarms were from the same place, J. B. Payne's residence, and a burning fire the cause. The boys responded promptly and were on the scene of action in a jiffy after the alarm was turned in.

D. and W. A. Rankin left this Thursday morning for Farwell, Texas, to look at a herd of four thousand cattle—every one a white face, which they will buy if they show up as well as represented. Some time ago they purchased a bunch of five thousand head in the Texas Panhandle country, which are to be delivered here in November. Tarkio Aval anche.

George W. Colvin has the model of his gravity engine nearly completed. Mr. Colvin has been in St. Joseph having the foundry work done and is employing a master workman to do the fitting. As much as is known of the machine is, that gravitation will be utilized by shift the weights on a wheel, so that it will rotate and will be governed by expansion. Maitland Herald.

They finished canning corn at the factory, Thursday of last week, the pack amounting to 25,000 cans, an increase of nearly 20,000 cans over last year's pack. From now on they will rush the tomatoes, and if favorable weather prevails, will pack about the same number of cans of tomatoes that they have of corn. Corn and tomatoes were never better, consequently the packs are fine.

Sam Ruby, while coming down a ladder off of Aug. Berres' residence, Friday morning of last week, Sep. 8, 1899, met with an accident that might have been fatal. The ladder turned with him and he fell a distance of nearly 40 feet, alighting upon his shoulders and back. While he was severely bruised, fortunately no bones were broken, and he is gradually recovering from the terrible shaking up that he received.

William Barlow, aged 17 years died on Monday morning Sep. 11, 1899, at nine o'clock at the home of Uncle Henry Reese near town. One day during the reunion here and Fred Jones were scuffling in a very playful way and Fred bit him on the cheek and from this blood poison set in and terminated in death. He has no relatives as far as is known. He was taken from the Atchison county almshouse ten years ago by J. W. Wilson and had been working as a farm hand at many places in this section. He was buried at the Parrish cemetery on Tuesday and his many young friends were in attendance.—Craig Leader.

All Gentry brought us in a couple of stalks of corn last week that are a curiosity in fact would be called a freak by many. However, it is said to be a regular variety of corn, but something new in this section. It is called the "Buffalo" corn. The top or tassel is very similar to the sugar cane top, and it attains a height of about six feet. The ears are about the size of an ordinary ear of corn, but each grain has a separate husk enveloping it and completely separating it from all the other kernels, while over the ear as a whole, are large husks, the same as on ordinary ears of corn. Mr. Gentry only has a small patch, which he is giving a trial. It is claimed to have advantages over the ordinary corn for feeding purposes, and makes a superior fodder.
